“The eConferences presented by BBI - The Australian Institute of Theological Education have been one of the more creative initiatives in the area of faith formation in Australia. They have also made their mark beyond our shores. That speaks of the need for what they offer – a deeper knowledge and love of Scripture and Tradition and the Lord who lies at the heart of both. It also speaks of the need to make effective use of digital technology in offering the Good News to the Church and the world. These DVDs allow people who were not part of the original eConferences to share the experience; they also allow those who took part to refresh the experience. I recommend them to everyone at a time like this, when we need to reach down in order to reach out, to learn more in order to speak more powerfully.”
